Summary

Senior Product Manager with 15+ years experience, including 2+ years in medical device product management at Intuitive Surgical, driving global market expansion and commercialization. Proven leader in developing go-to-market strategies, scaling platforms across 30+ international markets, and aligning cross-functional teams under regulatory and AOP constraints. Adept at leveraging ecosystem solutions to enhance customer value and inform product development.

Experience

Global Product Manager at Intuitive Surgical — Jul 2022– Present

Managed the development of innovative software products in a fast-paced tech environment. — *Sunnyvale*

- Led product vision and multi-year roadmap for global Salesforce-based services platforms, driving $10M+ ARR impact through improved renewals and expansion across 30+ international markets.
- Identified customer friction in value articulation and led the strategic launch of a freemium Ecosystem Value Scorecard, significantly increasing executive-level engagement and deal confidence across global accounts, informing GTM strategy.
- Prioritized analytics platform development to improve executive decision quality and inform product development, leveraging data to understand external customer needs and internal stakeholder requirements.
- Championed Snowflake-based platform modernization for foundational data assets, prioritizing scalability and governance; reduced query latency by 27% and improved analytics performance by 26%, directly supporting cloud adoption.
- Increased customer adoption and decision effectiveness by 22% through launching predictive deal insights and personalized dashboards, enhancing in-market solutions for existing customers.
- Led global market expansion by scaling platforms across 30+ international markets, embedding localization, data governance, and HIPAA-aligned compliance, ensuring regulatory adherence and commercial readiness.
- Drove cross-functional alignment across Product, Engineering, Data, Sales, Finance, Legal, and GTM teams, navigating regulatory and AOP constraints to prioritize market expansion and commercialization initiatives.
- Built and defended DVF-based business cases to secure leadership funding for high-ROI surgical robotics initiatives, effectively de-prioritizing low-signal feature requests and managing roadmap tradeoffs.
- Built ML driven renewal and expansion propensity models using usage, service, and contract data, improving churn prediction accuracy by 35% and contributing to a 12% lift in renewal conversion.
- Launched AI powered deal scoring and pipeline risk models embedded in Salesforce, helping sales and finance prioritize high value opportunities and improving forecast accuracy by 18%.
- * Developed AI based ROI and value realization models behind the Ecosystem Value Scorecard, increasing data backed upsell approvals by 22% across global enterprise accounts
- * Introduced anomaly detection on account usage and service patterns, reducing late stage deal surprises and revenue leakage by 15%
- Implemented explainable AI governance for predictive models in HIPAA regulated environments, enabling global rollout across 30+ markets with zero compliance escalations

Lead Product Manager at Hitachi GlobalLogic — 2021–2022

Oversaw product development life cycle and ensured alignment with overarching business goals. — *Sunnyvale*

- Owned 0→1 product strategy and roadmap for a unified enterprise data intelligence platform, consolidating insights from 10+ systems to provide comprehensive performance visibility.
- Drove adoption of a centralized, API-first data platform, accelerating data reuse and reducing platform complexity by 30%, foundational for scalable attribution systems.
- * Built ML driven insight discovery and automated KPI tagging across enterprise datasets, reducing manual reporting effort by 40% and accelerating leadership decision cycles
- * Deployed predictive analytics models on top of the data platform to forecast revenue, capacity, and delivery risk, improving planning accuracy by 25%

Product Manager at Blue Shield of California — 2016–2021

Analyzed product performance and provided feedback to teams to ensure optimal usability. — *San Francisco*

- Owned digital product strategy for member-facing web platforms serving 250K+ Medicaid and SMB users, enhancing user experience and data accessibility in a regulated environment.
- Prioritized roadmap using customer insights, operational constraints, and revenue impact, improving service efficiency by 17% via CRM analytics and workflow optimization.
- * Launched ML based member segmentation and risk scoring to personalize digital journeys, increasing care program engagement by 18%
- Built predictive models to flag claims delays and service drop offs, reducing operational backlogs by 20% and improving member satisfaction

Product Specialist at Cognizant Technology Solutions 2011–2016

Analyzed product performance and provided feedback to teams to ensure optimal usability. *Bengaluru*

- Designed and scaled healthcare data interfaces and Oracle pipelines, improving ETL throughput by $\tilde{3}$0% across enterprise payer systems.
- Standardized onboarding workflows and product documentation, reducing time-to-value and enabling repeatable enterprise deployments.
- * Built standardized healthcare data pipelines that powered risk prediction and utilization forecasting models, improving downstream analytics accuracy by 30%
- * Enabled payer ML models by improving data completeness and feature quality across Oracle and ETL systems, reducing model training errors by 25%

Skills

Soft Skills: Leadership, Collaboration, Communication, Analytical Thinking, AI prototyping, Creativity, User Research, Competitive Analysis, New Product Launch, Product Strategy, Pricing Strategy, Agile Frameworks.
Hard Skills: Confluence, Agile Scrum, Notion, Figma, Amplitude, JIRA, SQL, SFDC, ProductBoard, Snowflake, Azure, AWS ,Tableau.
